

Quicklink ST100 & ST200

Ultra-low latency, HD bi-directional live encoder/decoder.

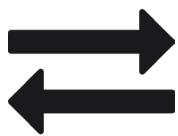

Transmit/receive live audio/video or audio only in real-time, with full duplex audio.

This solution is an essential element in any point to point broadcast solution where low latency, high quality broadcast links are required. Receive from any Quicklink studio contributor – ST500, ST150, ST100, iOS App or chrome browser for broadcast output via HD-SDI, HDMI and IP (NDI, MPEG-TS).

Product Highlights

- ▶ Full duplex audio and video
- ▶ HD-SDI, HDMI, IP inputs and outputs
- ▶ Support balanced XLR analogue, AES digital and AES67
- ▶ Can be used as both an encoder and decoder simultaneously in point-to-point or relay mode between the main and remote studios

Main Uses

Send and receive point-to-point HD-SDI video and audio

Integrate ultra-low delay audio commentary into your workflow

Receive HD-SDI content from any global Quicklink Studio contributor

Transmit/receive live audio/video or audio only in real-time, with full duplex

ST100

- ▶ 1 channel input/output to HD-SDI, HDMI and NDI
- ▶ Compact single power supply

ST200

- ▶ 2 channel input/output to HD-SDI & NDI
- ▶ Dual power supply and RAIDed drives

Workflow
